Dear Human Resources,

In my current work as a computer technician at Castleberry ISD, I provide computer support and repair to over 1,000 student netbooks and over 60 faculty laptops, Apple iPads, SMARTboard equipment, document cameras, projectors and printers. I have excellent telephone communication skills and able to walk customers through simple step-by-step solutions to technical problems over the phone.

I have extensive knowledge of troubleshooting computer hardware and software and excellent technical skills. I have over 44 credit hours at TCC in Information Technology along with holding a CompTIA A+ certification and over 2 years of on the job experience, I'm certain I have all of the required skills to be successful in the position.

Being a computer technician requires not only great analytical abilities but also the interpersonal skills necessary to work well with others. I get along with my coworkers and am very patient with teachers. I treat everyone with courtesy and respect.

I would really like to have an in-person interview to further discuss the computer technician position. I know I have a lot to offer and if I fit the criteria please contact me at 682-215-9503 or by email.

Sincerely,

A handwritten signature in black ink that reads "Alex Espinoza". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

Alex Espinoza
