Dear Human Resources,

I was first introduced to web development over a year ago. It all started when I was asked if I could make a website for a friend. Not knowing anything about designing a web site, I came across what is known as a WYSIWYG (What You See Is What You Get) editor where I created a web site by dragging and dropping items onto the page. I enjoy building and creating things, but I never thought I would find it as fulfilling as I do building a computer, or rebuilding an engine, or even creating art with my kids in our garage. From that moment on I knew that web development is what I wanted to do for the rest of my life, so I attended college to learn to code and joined an online coding boot camp to harness my skills as a web developer. My journey started from helping a friend build a web site to it becoming a passion and a career choice, I continue to learn and harness my skill every day so I can become a great web developer.

During my time at college and Thinkful boot camp I work with languages such as **HTML5, CSS3, JavaScript, PHP, MySQL, Java** and **C++** I also worked with the following libraries such as **bootstrap, jQuery, AJAX, JSON**. I've also worked with the following AdobeProducts **Photoshop, Illustrator, Fireworks, InDesign** and **Dreamweaver**. Other tools I used to help me in web development are, **Github** to create repositories of my work (I always remembered to "commit") and **Github Pages** to post completed sites and projects, I also used programs like filezilla to transfer documents to server. I'm also familiar with the following text editors, **Sublime Text Editor, Microsoft Visual Studios, Eclipse, Notepad++, and regular Notepad**.

"At the end of it all, I want to be part of a team where I can grow my skills and create beautiful and responsive web sites for the world to see. I believe you will help me reach my goals and help me grow in the field of web development."

Sincerely,

A handwritten signature in black ink that reads "Alex Espinoza". The signature is fluid and cursive, with some variations in line thickness.

Alex Espinoza

Alex Espinoza

Computer Technician

HELLO

this is my resume

Who I am

Name	Alex Espinoza	Email	aespinoza123@gmail.com
Phone	682.553.8617	Website	aespinozagit.github.io/myPortfolio
Address	9708 Stoney Bridge Rd. Fort Worth, TX 76108	github.com/aespinozagit	www.linkedin.com/in/aespinoza123
		codepen.io/aespinoza123/	instagram.com/5thedesign/
